S. PRIYADHARSHINI

ASPIRING AI ENGINEER | DATA SCIENTIST

Chennai, Tamil Nadu | +91 96003 67248 | reshmapriya2001@gmail.com
GitHub: github.com/priyadharshini-11s | LinkedIn: linkedin.com/in/priya-s2001

PROFESSIONAL SUMMARY

Computer Science postgraduate with an interest in Artificial Intelligence, Data Science, Machine Learning, and Deep Learning. Familiar with Python, SQL, data preprocessing, model evaluation, computer vision, and AI application development through project work. Seeking an entry-level AI Engineer or Data Scientist role to contribute to practical, data-driven solutions.

TECHNICAL SKILLS

Programming: Python, SQL
Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau
Machine Learning: Regression, Classification, Supervised & Unsupervised Learning, Scikit-learn, Model Evaluation
Deep Learning: ANN, CNN, RNN, TensorFlow, Keras, Transfer Learning
AI & NLP: NLP, LLMs, Generative AI, RAG, LangChain, Hugging Face
Tools & Deployment: Jupyter Notebook, Google Colab, Git, GitHub, Streamlit, Flask, REST APIs

EXPERIENCE

AI & Data Scientist Research Intern | Rubixe, Bangalore
May 2025 – October 2025

- Assisted with developing and training machine learning models for predictive maintenance.
- Worked on data preprocessing and feature engineering to support model performance.
- Collaborated with senior researchers to review model results and improve experiments.

SELECTED PROJECTS

Pneumonia Chest X-Ray Classification

Built an image-classification workflow for NORMAL and PNEUMONIA chest X-rays; explored preprocessing, CNNs, transfer learning, feature extraction, classical ML comparisons, evaluation metrics, and SHAP explainability.
Technologies: Python, TensorFlow/Keras, OpenCV, Scikit-learn, SHAP
Notebook: github.com/priyadharshini-11s/AI-Project/blob/main/Pneumonia_XRay_Classification.ipynb

Indian Sign Language Recognition

Compared deep learning and traditional ML for image-based sign recognition; used preprocessing, augmentation, evaluation metrics, confusion-matrix analysis, and Grad-CAM. Reported validation accuracy: 97.56% for fine-tuned MobileNetV2.
Technologies: Python, MobileNetV2, EfficientNetB0, OpenCV, Scikit-learn
Notebook: github.com/priyadharshini-11s/AI-Project/blob/main/indiansignlanguagerecognition.ipynb

Traffic Sign Classification Using CNN

Developed a CNN workflow covering dataset inspection, image preprocessing, model training, evaluation, confusion-matrix analysis, and saving the trained model across 43 traffic-sign classes.
Technologies: Python, TensorFlow/Keras, OpenCV, Pandas
Notebook: github.com/priyadharshini-11s/AI-Project/blob/main/trafficsignal.ipynb

Multi-Format Document Chatbot

Streamlit-based document Q&A; chatbot concept for PDF, Word, Excel, PowerPoint, HTML, TXT, and CSV files, using LangChain and Hugging Face embeddings for contextual responses.
Technologies: Python, Streamlit, LangChain, Hugging Face, RAG

EDUCATION

M.Sc. Computer Science | R. B. Gothi Jain College for Women, Chennai | University of Madras
2023–2025 | Score: 8.8 (please confirm whether CGPA or percentage)
B.Sc. Computer Science | R. B. Gothi Jain College for Women, Chennai | University of Madras
2020–2023 | 76%

CERTIFICATIONS & ASSESSMENTS

DataMites training | NASSCOM assessment | IABAC assessment (status to be confirmed)
